

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 10, 2010

Water Body Under Evaluation:

Water Body ID #: 0856
Name: Little Muddy Creek (Class C)
Length of Segment: 7.5 miles
County (ies): Pettis

Use Attainability Analysis (UAA) Study:

UAA ID #: 0945
Submitter: SES, Inc.
Date(s) Conducted: September 18-19, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown

Comments: The UAA survey was conducted in September 2008 and no WBCR was observed. ATV tracks were observed. A 2005 UAA interview cited seeing swimming as a use occurring on this stream. No interviews were conducted during the 2008 UAA.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream did meet the maximum depth criterion at all five locations and the median depth criterion at one location. Because the stream met the depth criteria and because there is evidence of existing use, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation:

☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
